## Successful management of refractory ulcerative colitis with orally administered serum-derived bovine immunoglobulin therapy

Beauerle BD, Burnett BP, Dryden GW.

Therapy with EnteraGam® resulted in management of stool frequency, loose consistency, rectal bleeding, and cramping.<sup>1</sup>

At time of presentation  
(Mayo UC grade 2 score)\*

≈2 months after EnteraGam®  
(Mayo UC grade 0 score)\*

\*Flexible sigmoidoscopy images.

# After 4 weeks of EnteraGam® therapy, patient reported 1 to 2 formed bowel movements per day<sup>1</sup>

## 60-Year-Old Caucasian Female: Summary of Case Presentation

“This case suggests that SBI [EnteraGam®] administration should be considered as add-on therapy when dealing with refractory UC patients.”

 **EnteraGam**  
(serum-derived bovine immunoglobulin/protein isolate, SBI)

### Important Safety Information:

EnteraGam® contains beef protein; therefore, patients who have an allergy to beef or any component of EnteraGam® should not take this product. The most commonly reported adverse events in clinical studies (incidence of 2%-5%) include mild nausea, constipation, stomach cramps, headache, and increased urination. EnteraGam® has not been studied in pregnant or nursing women, so the choice to administer EnteraGam® for patients who are pregnant or nursing is at the clinical discretion of the prescribing physician. EnteraGam®, as a medical food, must be used under physician supervision.

EnteraGam® does not contain any milk products such as lactose, casein, or whey. It is gluten-free, dye-free, and soy-free. EnteraGam® contains 5 g of SBI and other ingredients such as dextrose (5 g) and trace amounts of sunflower lecithin.

Please see full Prescribing Information including contraindications.
